AN ISO Company 9001-2008

**2 MEN**

Features includes tough nylon taffeta cloth which is used to construct inner tent and fly sheet which stands on two vertical and one horizontal aluminum folding poles. Fly sheet is extended on the back side in two and four mm tent and touch the ground giving extra space to store ration, equipment or back packs. Tough, coated nylon ground is water proof and stitched with inner tent. Main gate is provided with see through (mosquito) net and half opening zippered gate at the back to utilize the back gate for storage under fly extension. Tents are provided with sufficient pockets and loops to hang anything inside the tent. Complete with stuff sack, poles, cord and stoppers.

**RUCK SACK**

These attractively designed packs cover a multitude of uses. With a range to cater from the summer walker to winter climber. The sack bundle and twails with you, giving a greater degree of balance. It can be used efficiently under varying circumstances and conditions to assist you in all your outdoor activities.

**4 MEN**

Fly sheet is extended on both sides by 48" and touch the ground giving extra space to store ration, equipment or back packs. Complete with stuff sack, pegs, poles, cord and stoppers.

**High Altitude Sleeping Bags**

Fabric: High Tenacity Nylon Rib Stop 75 GSM Water Repellent Urethane Coated Outer Inner Lining 100% Nylon Filling with Goose Down shells in Trapezoid baffles. Specification includes shaped box foot, one side full opening zipper, include nylon compression sack, 84" long x 32" wide size.

**Key Features:**

- Filled with 90% goose down on the top, 90% goose down on the base.
- Trapezoid baffles construction and differential fill ensure maximum insulation and eliminates down shift that can cause cold spots. Hanging loops for storage and airing.

**"DOWN" FEATHER FILLED**

Filling	1200 gms
Temperature	-20° C
Weight	1890 gms
Pack Size	43 x 26 cm

**Carry Mat**

Some kind of insulation is essential to prevent heat loss when sleeping on snow or cold ground. Our Carry Mat is closed-cell rubber foam pad which is light weight, water-proof, inexpensive and comfortable and very effective on snow or cold ground.

Size: 8mm thick x 72" long x 24" wide

**WIND PROOF TROUSER**

Supple, well cut over trouser which is water proof and allow good freedom of movement. Wide elasticated waist, Velcro adjustable foot cuffs with snap. Inner made of nylon.

**WIND PROOF JACKET**

Comfortable functional jacket made from double layered tough nylon fabric. It is so designed that it has full opening zipper with wind flap. Two cargo pockets, velcro adjustable cuffs for weather proofing. Drawstrings at hood which is folded inside the collar and on the waist.
